

WENDY LECTER

GUITARS, PIANO & STRINGS

Wendy Lecter is an independent Industrial and Experimental Metal project exploring the darker and more vulnerable sides of the human condition.

Blending heavy guitar riffs, powerful metal arrangements and clean, melodic vocals, the project creates a distinctive sound shaped by industrial metal, alternative music and dark cinematic atmospheres.

Drawing inspiration from artists such Rammstein and Nine Inch Nails, alongside the evocative film compositions of Angelo Badalamenti, Wendy Lecter brings together music, and visual imagery in a conceptual approach to contemporary metal.

Each song explores a different aspect of human experience, combining intense musical expression with personal narratives and carefully crafted visual worlds.

MY WISH

Released on November 13, 2026, *My Wish* is the debut single from Wendy Lecter's conceptual album *Human Shadows*.

Set against the vast and desolate landscapes of the Californian desert, the song explores memory, personal choices, regret and the difficult process of coming to terms with one's past.

Its accompanying music video unfolds as a cinematic journey through three stages of life, bringing together different versions of the same person in a symbolic encounter with memory, time and mortality.

At its heart, *My Wish* is a reflection on the roads we take, the decisions that shape us and the truths we eventually must face.
